

Softline Data, Inc. Announces UBsync Tablet Meter Read Collector

UBsync

New Release! UBsync Tablet Meter Reading System, capture & post your readings directly into UBmax or other billing software.

Making manual input an obsolete process. Enter data with your hand or a Stylist Pen for cold snowy/wet days.

Why spend thousands, when UBsync starts at only \$20 a month.

Even if you have electronic readers or other handhelds, you can receive emails, take pictures of damaged meters and view Work Orders on your tablet.

Tablets get used and abused; with UBsync you can buy affordable tablets whenever the need arises.

If you do not have electronic, radio, or a Touch Reader system for collecting meter readings you need **UBsync**. UBsync allows you to use any Android Tablet to collect, store and upload to your meter readings to billing software or input file. Use any Android tablet.

- No more pen & paper
- No smeared writing
- Reduce read errors
- Photograph damaged meters
- Receive/Send Emails
- Process Work Orders
- View customer status
- Assist payment collections
- Interface direct with UBmax
- Upload meter file formats
- No small buttons to push
- Use Wi-Fi to save readings
- Unlimited number of Tablets

Even if you have electronic readers, this is a great tool for use in the field.
